SUPERDECK®
Deck & Dock Elastomeric Coating
3100 Series
50 VOC

General Description
SUPERDECK® DECK & DOCK ELASTOMERIC COATING with “Splinterlock Technology” is a high build elastomeric coating designed specifically for new or old damaged wood and concrete surfaces. The unique formula provides long lasting protection against moisture and the damaging effects of the sun. It is designed to expand and contract along with the substrate while offering excellent scuff resistance for heavy duty foot traffic areas. Deck & Dock will lock down splinters and bridge dimensionally unstable cracks on old damaged wood surfaces. Deck & Dock also contains a highly effective mildewcide and algacide to protect the coated surface from mildew and algae growth. Use Duckback™ Anti-Skid Additive to provide an attractive skid resistant surface on decking, boat docks, stair treads, ramps, and walkways.

Recommended Substrates
New or old exterior wood decking, boat docks, plywood decking, composite decking, ramps, balconies, porches, stairs, walkways, and concrete surfaces. Note: not for use on garage floors, driveways, or automobile traffic areas. Deck & Dock will fill cracks up to 1/4” making it ideal for resurfacing old damaged wood decking and concrete patios. Use of Deck & Dock on old badly damaged decking is an effective alternative to the costly expense of deck replacement.

Tinting & Base Color Information
Deck & Dock can be used as is or it can be tinted with up to 8 ounces of colorant per gallon. Tintable to 57 additional colors.

SC 3101-WHITE
SC 3102-ADOBE
SC 3103-RED
SC 3104-BROWN

For Extremely Damaged Wood and Concrete

Product Application
SURFACE PREPARATION:
All surfaces must be clean, dry, and free from dirt, mildew, dust and other foreign matter. Remove mildew and contaminants with Superdeck® Wood Cleaner. Previously sealed, stained, or painted surfaces must be properly prepared. Remove all loose peeling paint, rinse thoroughly with water and allow to completely dry before coating. New concrete must be 28 days old (fully cured) before using product. Smooth concrete surfaces must be etched before coating to allow the product to penetrate and adhere to the concrete. Concrete surfaces must be rough to the touch or have a texture as rough as 120 grit sand paper. Test bare concrete surfaces by sprinkling with water. If water does not readily absorb into the concrete proceed to etching. If etching is necessary, use Mason’s Select® Concrete Etcher. Simply apply Mason’s Select® Concrete Etcher, let it work for approximately 30 minutes, scrub and rinse with water. Once etching is completed, surface must be neutralized using Mason’s Select® Concrete Cleaner. Follow Mason’s Select® Concrete Cleaner instructions for neutralizing concrete surfaces. Note: This Product is lead free. WARNING! If you scrape, sand or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH–approved respirator to control lead exposure. Clean up carefully with a HEPA Vacuum and wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.
Product Application (cont.)

**PRODUCT PREPARATION:**
Shake well or stir thoroughly from bottom to top of container and occasionally during application. When using more than one container of product, intermix all containers to ensure color consistency. Test small area first for color satisfaction.

**THINNING:**
None required.

**APPLICATION:**
Apply with brush, roller, or airless sprayer. When rolling use 3/8” nap synthetic roller cover for smooth finishes, 1/2”-3/4” nap for medium texture finish, and 1-1/4” nap for heavy texture finishes. Back rolling is suggested when spraying working the product smoothly and evenly into the surface to ensure a uniform appearance. Always maintain a wet edge to avoid lapping. Test Area: Always apply product to a small test area and allow to dry completely before coating entire project to ensure desired color and appearance.

**SLIP RESISTANCE:**
Use Duckback™ Anti-Skid Additive to create a slip resistant surface on patios, sidewalks, ramps, stairs, pool-sides and other areas that require a non slip surface. Just add Anti-Skid to final coat of Deck & Dock and apply with a roller. Anti-Skid product meets recommended standards set forth by the Americans with Disabilities Act (ADA).

**APPLICATION TEMPERATURE:**
50° F - 90° F. Do not apply product in extreme heat of day or if surface is hot to touch. Do not apply product if rain is likely to occur within 24 hours.

**DRY TIME @ 77° F:**
1 Hour to touch. Allow surface to dry until it can be lightly walked on (2-4 hours) before recoating. Once the final coat has been applied allow 24-48 hours dry for normal foot traffic. Dry time can be affected by temperature and humidity. Dry time may be prolonged in cooler temperatures.

**SPREAD RATE:**
Coverage may vary on surface condition, type of surface and number of coats applied. On most wood and concrete surfaces the coverage will be about 75-125 square feet per gallon for application of 1-2 coats. When filling deep cracks in concrete or locking down splinters on old extremely damaged wood surfaces additional coats may be needed.

**MAINTENANCE:**
Apply one new coat of Deck & Dock every 5-7 years to a clean surface to renew color and maintain durability. Areas exposed to heavy foot traffic may require more frequent maintenance.

**CLEAN UP/DISPOSAL:**
Clean brushes and equipment with soap and water. If product dries on tools, use paint thinner to clean. Dispose of empty container or unused portion in accordance with local, state, and federal regulations. Close container when not in use.

**SAFE-USE AND STORAGE:**
When using, do not eat, drink, or smoke. Wash hands after use. Avoid prolonged contact with skin and breathing vapors or spray mist. Use only in well ventilated areas. When spraying use NIOSH approved respirator mask. Wear protective clothing, gloves, goggles and apron. Keep container tightly closed when not in use. Store at temperatures above 32° F. Keep from freezing. CAUTION! KEEP OUT OF REACH OF CHILDREN. DO NOT take internally. Avoid contact with eyes, skin, or clothing. DO NOT use on surfaces intended for food, feed, potable water, livestock, or dairy animals.
**FIRST AID:**
If swallowed do not induce vomiting. Seek medical attention immediately. Eye Contact: flush immediately with water continuously for 15 minutes. Skin Contact: wash thoroughly with soap and water. Get medical attention if irritation persist. In case of spill, absorb with inert material and dispose of in accordance with applicable regulations.

**WARNING:**
This product contains chemicals known to the state of California to cause cancer, birth defects, or other reproductive harm. **CAUTION! KEEP OUT OF REACH OF CHILDREN.**

### Product Guarantee

**LIMITED LIFETIME WARRANTY:** Manufacturer warrants your complete satisfaction with the performance of this product as long as you own or reside in your home when product has been applied and maintained in accordance with all product instructions to an architecturally sound structure and subjected to normal use. Manufacturer further warrants that at the time of sale this product conforms with applicable Manufacturer specifications and is free of manufacturing defects. Subject to the terms of this warranty, if you are not completely satisfied with the performance of this product Manufacturer will replace the product or refund the purchase price paid at Manufacturer’s sole option. This warranty is valid for as long as you own or reside in your home, applies to the original Purchaser and is not transferable. As a condition to this warranty, proof of purchase, complaint description, and photograph must be sent to Manufacturer for warranty evaluation. Manufacturer’s sole liability for products proven defective and or found subject to this warranty, shall be replacement of the product or refund of the purchase price paid, at the sole option of Manufacturer. This warranty does not include any costs of labor. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, MANUFACTURER MAKES NO OTHER WARRANTIES, GUARANNEES, OR REPRESENTATIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED, OR BY USAGE OF TRADE, AND HEREBY EXPRESSLY EXCLUDES AND DISCLAIMS ALL IMPLIED WARRANTIES, OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT SHALL MANUFACTURER BE LIABLE FOR PUNITIVE, SPECIAL, INCIDENTAL, EXEMPLARY OR CONSEQUENTIAL DAMAGES OF ANY KIND. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation may not apply to you. This Limited Warranty gives you specific legal rights and you may have other rights which vary from State to State.
